

Erasmus+

“Next generation networked media over 4G+ infrastructures” NEREUS

Multiplier Event, Chania, Crete, Greece, 22 May, 2019

NEREUS is an ERASMUS+ project in the field of “Next generation networked media over 4G+ infrastructures”, funded by the State Scholarships Foundation of the Greek Ministry of Education (IKY) under the Strategic Partnerships for Higher Education (KA2) framework. The project aims to offer a multidisciplinary programme for skills development in the areas of Novel media coding and “green” transport mechanisms, Open network architectures with service orchestration, QoS/QoE modelling & management, Next generation cloud-based services, as well as on Secure and trustworthy communications, through a number of Intellectual Outputs, Educational material and the associated Learning/Teaching/Training Activities. This Multiplier Event (2 ½ hours-session hosted by the “6th ERASMUS Week” that is held by the Hellenic Mediterranean University) aims to briefly discuss and disseminate the project’s results, as well as to distribute knowledge and experiences gained through the multi-national collaboration of European HEIs towards a new curriculum for last year undergraduate or first year postgraduate students in the fields of ICTs.
