

Erasmus+

“Next generation networked media over 4G+ infrastructures” NEREUS

Multiplier Event, Chania, Crete, Greece, 26-27 June, 2019

NEREUS is an ERASMUS+ project in the field of “Next generation networked media over 4G+ infrastructures”, funded by the State Scholarships Foundation of the Greek Ministry of Education (IKY) under the Strategic Partnerships for Higher Education (KA2) framework. The project aims to offer a multidisciplinary programme for skills development in the areas of Novel media coding and “green” transport mechanisms, Open network architectures with service orchestration, QoS/QoE modelling & management, Next generation cloud-based services, as well as on Secure and trustworthy communications, through a number of Intellectual Outputs, Educational material and the associated Learning/Teaching/Training Activities. NEREUS is at its closing phase, and this Multiplier Event aims to disseminate the project’s results to all relevant/interested stakeholders, familiarise them with NEREUS educational material, as well as to distribute knowledge and experiences gained through the multi-national collaboration of European HEIs for designing, implementing and delivering a new curriculum for last year Bachelor or first year MSc students in the fields of Informatics and Internet technologies, Telecommunications and Network engineering, Social Media sciences and Security. Participants will have the chance to discuss the prospects of NEREUS, express their opinion and provide feedback on possible enhancements and/or future exploitation strategies.
